## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-10 are allowed.

The following is a statement of reason for the indication of allowance: As the applicant stated in the remarks of the amendment filed on 12/11/2006.

Applicant's independent claims 1 and 7: The present invention is directed to method of selecting base station antennas for connection with a mobile user terminal in a radio telecommunications network, the independent claim identifies the patentably distinct feature "wherein upon the determined signal path quality exceeding a first predetermined threshold but being less than a second predetermined threshold higher than the first predetermined threshold the mobile user terminal is connected to the corresponding base station antenna by control channels but not data channels so as to be time synchronised; and wherein upon the determined signal path quality exceeding the second predetermined threshold the mobile user terminal is connected to the corresponding base station antenna by both control channels and data channels so as to be call connected". Applicant's independent claims 1 and 7 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
